

FEE SCHEDULE

NEW ONCOLOGY VISITS “GATHER & GUIDE”

We base new cancer patient pricing on the staging of the cancer, as the complexity of our care changes in correspondence.

If you are unclear on where you would fall in pricing — please feel free to reach out to our Patient Care Specialist, Alyssa, who can help determine which category you fit into. *Please directly contact her for questions at Alyssa@optionsnaturopathic.com.*

Please be aware that all of our initial oncology visits are split up into what we call a “**Gather & Guide**” program. You will be onboarding with Dr. Patrick to **gather** all critical information to present to Dr. Erin or Dr. Laura before the second visit where you will be **guided** in your process.

<u>NEW CANCER VISIT</u>	Dr. Erin	Dr. Laura
STAGE I	\$750	\$600
STAGE II	\$750	\$600
STAGE III	\$900	\$750
RECURRENCE	\$900	\$750
UNKNOWN	\$900	\$750

After the new patient visit, patients are classified as **Basic** or **Complex** depending on the overall state of health, hereby referred to as ‘**terrain**’. All fees are dependent on this classification and which **doctor** you are working with. Payment is due on the day of service. Payment plans are not available.

Classification is done by our team and is based on current/previous dietary habits, treatments (pharmaceuticals, hormones, antibiotics, etc.), number of diagnoses, as well as other parameters. It is these components of your **terrain** that drive this complexity and determine the level of support and care required. All active cancer patients are considered “**Complex**”. In certain circumstances, patients need **Acute** support, as well as **Critical** support (cancer patients) on their road to health. We have also worked these circumstances into our updated Fee Schedule.

Prices listed in the table below are **the total fees per consult**, no matter the length, depending on the type of care received at that visit. Fees include gathering in-depth history, assessment & explanation of lab results, creation of a comprehensive care plan and coordination of laboratory orders recommended by the doctor, as well as communication needed with other practitioners when a prescription, testing or referrals are needed.

<u>CONSULT TYPE</u>	DESCRIPTION	Dr. Erin	Dr. Laura	Dr. Patrick
<u>NEW</u>				
ABBREVIATED	Basic Review of one Primary Issue & Plan	N/A	N/A	\$150
